Working cold start valve, finally :) 1982 Audi 100 2.2 5E.

1982 Audi 100 5E cold start
The cold start injector, also referred to as the cold start valve, is an engine management component found on many road going vehicles. It's purpose is to supply the engine with additional fuel to enrich the fuel mixture in cold temperatures where air density is increased and additional fuel is required.

Symptoms of a Bad or Failing Cold Start Injector ...
The Audi 100, Audi 200, (and sometimes called Audi 5000 in North America), are primarily four-door, front-engine, front- or all-wheel drive full-size/executive cars, manufactured and marketed by the Audi division of the Volkswagen Group for model years 1968 through 1994 — across four generations (C1–C4), with a two-door model available in the first and second generation (C1-C2), and a five ...

Audi 100 - Wikipedia
Hard starting from a loss of residual fuel system pressure, can be caused by leaky injectors, a bad fuel pump check valve, a leak in the warm up regulator or from a leaky cold start valve. The pressure regulator valve in the fuel distributor can also be leaking on the 1986-88 5000TQ (early 1989 200TQ) and this will cause a loss of residual pressure.

SJM Autotechnik, Audi Technical Service Repair Information
The car's cold start valve is similar in function to your standard fuel injectors, spraying gasoline into the fuel-air mix. For optimal reliability in starting, particularly in winter weather, a cold start valve it is necessary. Aging cold start valve will likely result in difficult starting the vehicle's engine when the weather is cold.
