Stated more formally:  
This is read as "The  
measure of the angle P  
is the measure of the  
arc CD minus the  
measure of the arc AB  
divided by 2" Recall  
that the measure of an  
arc is the angle it  
makes at the center of  
the circle. To see this  
more clearly, click on  
"show central angles"

4. Angle Formed Inside  
of a Circle by Two  
Intersecting Chords:  
When two chords  
intersect “inside” a  
circle, four angles are  
formed. At the point of  
intersection, two sets  
of vertical angles can  
be seen in the corners  
of the X that is formed  
on the picture.

is a relationship between the angle created by the secant line segments and the two arcs, shown in red and blue below, that subtend the angle. Secants AB and AC form  $\angle BAC$  which intersects circle O, creating arcs BC (in red) and DE (in blue).

### **Secant - Math**

The brown angle is the angle formed by two intersecting secants.
