BS EN IEC 60079-0:2018 - Explosive atmospheres. Equipment ...

BS EN 60079-10-1:2009 makes use of the concept of a nominal flammable gas cloud volume V_z to determine the level of ventilation and hence the zone. However, the critical formulae given in the standard to estimate V_z have no scientific justification. Previous work reported at Hazards XIX has demonstrated that these formulae over-estimate V

New methods for hazardous area classification for ...

The most commonly used standard in the UK for determining area extent and classification is BS EN 60079 part 10 1, which has broad applicability. The current version makes clear the direct link...

Hazardous Area Classification and Control of Ignition Sources

The classification of hazardous areas into zones established the level of protection required for electrical equipment installed in explosive gas atmospheres (IEC 60079- 10) Since this approach proved successful, it was applied to explosive dust atmospheres (IEC-EN 61241-10) The new edition of IEC 60079-0 (2007) [EN 60079-0 (2009)] progressively replaces IEC-EN 60079-10 and IEC-EN 61241-10 by the two following standards:
