Addition and Subtraction of Vectors 5 Fig. A.13 shows A to be the vector sum of A_x and A_y . That is, $A = A_x + A_y$. The vectors A_x and A_y lie along the x and y axes; therefore, we say that the vector A has been resolved into its x and y components. The unit vectors i and j are directed along the x and y axes as shown in Fig. A.13.

Lesson 15: Solving Vector Problems in Two Dimensions We can now start to solve problems involving vectors in 2D. We will use all the ideas we've been building up as we've been studying vectors to be able to solve these questions. The majority of questions you will work on will involve two non-collinear (not in a straight line) vectors that will become part of a right-angle triangle.
